Late

Blush™ White

Cut mums are a great fall crop for extended sales after dahlia season ends.

Basic Growing Instructions

- ◆ Plants should be grown in a high tunnel for protection from frost when they are at their peak bloom.
- ◆ Northern growers with early cold weather may want to use the Early varieties.
- ◆ Plants should be planted upon arrival.
- ◆ Pinch the plants three weeks after planting, around July 5th, leaving six leaf nodes, resulting in six stems per plant.
- ◆ Early, Mid, or Late bloom time is listed on each photo.

Early varieties that start blooming Oct 19 -21

Mid varieties that start blooming Oct 24 - 30

Late varieties start blooming Nov 3 - 8

(Based on Zone 6b, SW Virginia)

- ◆ Space two plants per sq foot.
- ◆ Support netting is required.
- ◆ Fertilize with 20-10-20 At 200ppm N
- ◆ Scout for aphids and white flies. Treat as needed.
- ◆ Side disbudding is not required, but will produce one large bloom on double flowered varieties, especially with Shanghai Red and Golden Gate.

2026 Drops: Dejay Time, Elliot, Oakview Yellow, Presideo Dark Pink

Solutions for Improving Functionality and Efficiency

We've redesigned our seed packet label to provide you with the important information you need to get growing.

The 1D barcode has been updated to a QR code. Scan with a smartphone or barcode scanner to access these details:

- Seed "exceeds germination of XX%"
- Updated germination and recent test date
- Marketing and technical support links
- Vendor lot number
- Packing list and all electronic files containing the actual germination and BVI numbers at the time of shipping
